

Pyramids Heights - A promising compound in the heart of Giza

In the heart of Giza, Samcrete Development has launched its flagship project, Pyramids Heights Residences, in 2015. A compound that is destined to lead a happier life-style.

Samcrete Development is now offering the opportunity to live in this spectacular project "Pyramids Heights Residences", a gated community with around 600 luxurious units ranging from fully finished apartments, duplexes, penthouses to semi-finished villas.

Well away from the hustle of the city, Pyramids Heights Residences is ideally positioned in 6th October City, neighbors to Sheikh Zayed, Smart Village, and some Educational Institutions. The project is built on 400,000m², with an approximate built-up area of only 15% and the rest is dedicated to green areas, roads, clubs and services. Some of the favorite features about this project are the sports club, clubhouse and the kids' area and what makes it unique is that all these amenities are included in the total unit price.

Laila Abdel-Kader, The Sales and Marketing Director of Pyramids Heights Residences, has stated: "We've proudly launched our first residential project to provide our valued clients with the exceptional way of living they've been looking for. To ensure optimum privacy for our residents, homes are set apart with spacing that reaches up to 12 meters. She added "I'm glad to say that our anticipations have perfectly met the clients' needs, as we've successfully sold around 50% of the project. I further confirm that we are working hard to start the delivery process by 2020".
